DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on December 26, 2006 has been entered.
2. None of the Claims have been amended, claims 4 and 11 have been deleted and no new claims have been added. Hence, claims 1-3 and 5-10 are pending in the application.

Claim Objections

3. Claim 1 is objected to because of the following informalities: in claim 1, the twelfth line after the formula (I), the term "or" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1755

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 and 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 1413315.

GB 1413315 teaches a water-soluble azo reactive dye of the formula

wherein Y_1 and Y_2 each independently represent H, an alkyl group, an alkoxy group or a sulfo group with the proviso that only one of Y_1 and Y_2 is H; A is an aromatic heterocyclic ring such as a benzothiazole ring that may be substituted with a sulfo group, a sulfamoyl group, N-lower alkyl-sulfamoyl group, N,N-di-lower alkyl sulfamoyl group, a carboxy group, an amino group, a lower alkyl amino group, a hydroxy group or a lower alkoxy group; R is a group of the formula $-SO_2-CH_2-CH_2-Z$; Z represents a hydroxy group and v and w are both zero. The water-soluble azo reactive dyes are suitable for dyeing and printing various materials such as cellulose-containing fibrous materials. See page 1, lines 7-24, page 2, lines 35-60, page 3, lines 1-5, example 12 and claims 1-7, 17-20 and 29-31. GB 1413315 fails to specifically exemplify a monoazo dye wherein A is a substituted benzothiazole as claimed by applicants.

Art Unit: 1755

Therefore, it would have been obvious to one having ordinary skill in the art to use the specific monoazo dye wherein A is a substituted benzothiazole as claimed by applicants as GB 1413315 also discloses the use of these monoazo dyes but fails to show an example incorporating them.

Allowable Subject Matter

6. Claim 5 is allowed.

7. The following is an examiner's statement of reasons for allowance: EP 1413315 fails to teach or fairly suggest a monoazo dye wherein there is a 6-membered ring annealed to the phenyl ring of the pyrazole group as claimed by applicants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The remaining references listed on forms 892 and 1449 have been reviewed by the examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.
